Projektron BCS professionally combines comprehensive tools for projects and companies into one software package. Individually scalable and providing a wide range of customisation options, the software can be easily adapted to meet your needs for a web-based project management.

MULTI PROJECT OVERVIEW

The overview of multiple projects summarizes essential information on ongoing projects in one view.

With comments on the course of the project.

PROJECT OVERVIEW

Tachometers and cost diagrams visualize the project development.

See the current status and deviations from plans at a glance.

With more than 30 elements, you can customize the overview according to your needs.

GANTT CHART

The Gantt chart visualizes the scheduling, structure planning and project progress. Traffic lights indicate time and cost overruns.

Identify resource conflicts in the Gantt chart.

VIDEO TUTORIALS FOR THE MOST IMPORTANT FUNCTIONS

MANUALS AND ONLINE HELP INTEGRATED INTO THE SOFTWARE

SUPPORT FOR TECHNICAL QUESTIONS
