PROJEKTRON BCS - MORE THAN JUST PROJECT MANAGEMENT SOFTWARE

BCS stands for Business Coordination Software. The web-based Projektron BCS project management software is synonymous with quality, efficiency and transparency. Project management, customer management (CRM), time recording, a ticket system and much more: Projektron BCS merges professional tools for projects and companies in a single software.

Project Management

Preparation

STRATEGIC IMPLEMENTATION

When introducing new software in a company, it is necessary to come up with an optimal roll-out strategy before implementation takes place. We will help you in making the right decision.

USER OPINIONS

Our flexible project management software can be used to increase profits in all situations where work is performed in projects. More than 700 customers throughout Europe rely on Projektron BCS, including international companies as well as medium-sized enterprises and public institutions. Alongside IT system houses and multimedia agencies, consulting firms and research institutions also count on Projektron BCS when it comes to planning their projects.

SANDSTEIN NEUE MEDIEN

„Projektron BCS was a real stroke of luck for us. In 2016, we were looking for software that would support our multi-project management. We found the all-in-one solution for our company!"

Ralf Junge

Head PMO, Sandstein Neue Medien GmbH, Dresden

ZF

"What we particularly value about Projektron BCS is being able to access real-time data and that our project data is always up to date despite the high level of complexity. With Projektron BCS, we can compile reports for clients at any time with the press of a button."

Christian Schmelzing

Head of Quality and Change Management for Machine Engineering, ZF Friedrichshafen AG

MERCOLINE
A DATAGROUP COMPANY

„BCS is the central tool for us, through which we map almost all processes. For the internal organization of work, resource planning has become indispensable.
We quickly benefited from the decision to reduce the amount of different tools and thus also diverse interfaces and finally decided that BCS should be our ERP system."

David Rosenau

Head of Solution Consulting/SAP Senior Consultant, Mercoline GmbH, Berlin
